Handling & Assembly Instructions	
➤	Use proper lead clamping or heat sinking techniques to prevent mechanical and/or heat stress to the glass seal during bending, cutting, soldering, and welding
➤	Mechanical shock as the result of dropping the reed switch typically from a distance of greater than 12" may change it's magnetic sensitivity and/or destroy the switch
➤	Any form of modification to the switch leads will alter it's magnetic sensitivity
➤	Series resistor recommended for >5m cable length

Life Test Data

\*Load increase reduces life expectancy of Reed Switches
